The Prize Contest for the Cyclopaedia and Cash premiums closed on the 27th. Next week Cashier Phillips will be called upon to pass on the winners and the results will be announced next Saturday, after which the prizes will be awarded.

## POR BOND ISSUE.

### Joint Committees Favor the Plan.

The Committees from the Business Men's Association and City Council held a joint meeting Wednesday night, Mayor Mercer acting as chairman and Mr. Harry Phillips as secretary. Nearly all the members were present.

Before the Committees were two efficient engineers—Mr. Howell, of Washington, D. C., and Mr. York, of Baltimore. They gave the committees much valuable information, and it was decided that \$30,000 was ample means to install water-works for fire protection and domestic uses. The Committees will report against sewerage, as it is their opinion it will not pay now.

The Committees have drafted a bill for presentation to the Legislature, asking the authority to issue the bonds required. After that, if the Council so decides, the people will vote on the question. If there is a majority in favor of the issuance of the bonds, which there surely will be, then Williamsburg will soon have ample protection from fire.

The Committees have decided that we should have an independent system. The operating expenses will be practically nothing and will be adequate in every particular. An engineer will be here next week to make a preliminary survey of the city in order to afford the Committees better information.

Unless the people vote it down, we are soon to have water-works.

### Escaped an Awful Fate.

Mr. H. Haggins of Melbourne, Fla., writes, "My doctor told me I had Consumption and nothing could be done for me. I was given up to die. The offer of Dr. King's New Discovery for Consumption, induced me to try it. Results were startling. I am now on the road to recovery and owe all to Dr. King's New Discovery. It surely saved my life." This great cure is guaranteed for all throat and lung diseases by Leonard Henley, druggist. Price 50c and \$1.00. Trial bottles free.

County Clerk Geddy has issued a license to Mr. W. H. Mincir, of Mulberry Island, Warwick county, to wed Miss Lucy Elizabeth Skillman, of James City. The wedding will take place March 5. The bride-to-be is 17.

James Bartlett, colored, stole from his employer, Mr. W. B. Burns, \$20. He confessed his guilt and was sent to jail for four months. Mr. Burns recovered a small amount of cash, and some goods purchased with his money.

### The Easy Pill.

DeWitt's Little Early Risers do not gripe nor weaken the system. They cure biliousness, jaundice, constipation, and inactive livers, by arousing the secretions, moving the bowels gently, yet effectually, and giving such tone and strength to the glands of the stomach, liver and bowels that the cause of the trouble is removed entirely. These famous little pills exert a decided tonic effect upon the organs involved, and if their use is continued for a few days there will be no return of the trouble. Leonard Henley.

Tuesday Mr. R. L. Spencer purchased of Mrs. Irene Jones, of Newport News, a 100-acre farm in James City county.

### Mysterious Circumstances.

One was pale and sallow and the other fresh and rosy. Whence the difference? She who is blushing with health uses Dr. King's New Life Pills to maintain it. By gently arousing the lazy organs they compel good digestion and head off constipation. Try them. Only 25c, at Leonard Henley's.

Messrs. R. L. Spencer and E. W. Warburton have sold a part of the Summer House tract to a western man for \$4,020, being at the rate of \$12. per acre.

### ELUSIVE BACILLI.

Scientists Find Much Difficulty in Destroying Germs of Typhoid Tuberculosis.

It is one of the disappointments of the medical profession since the bacteria theory of many diseases has been fully established that all efforts to find an antidote for the tubercle typhoid bacillus have failed, says a special to the St. Louis Globe-Democrat. An antitoxin has been provided for the diphtheria bacillus, because the person of this bacillus passes out of its cell and is soluble. The person of typhoid tuberculosis is intracellular and remains there, and cannot be reached under ordinary conditions. Recent experiments by bacteriologists, with the assistance of Prof. Dewar, of the effects of extreme cold upon the bacilli show that they survive at the lowest temperature attainable. It was discovered, however, that when frozen in liquid air the bacilli became extremely brittle, so that they could be triturated into exceedingly fine powder and their cellular character thus destroyed. It is possible to experiment with antitoxins upon their poisonous contents, and it is hoped before long that this method will lead to the discovery of a treatment which will destroy the germs of typhoid tuberculosis in the human body.

## CREATING A WATERFALL.

Great Piece of Engineering That Has Been Accomplished at Niagara.

When the waters of the Niagara river were made to flow over turbines to give electric power and light to the city of Buffalo it was considered a great revolutionary feat of engineering. But at Niagara, the dam and the fall were there from the beginning. The power was ready in the rough—it had only to be applied to the machinery. When, however, it was proposed to utilize the speed and force of the Hudson river and to turn them into the power that lights towns, runs street railways and vitalizes factory plants the problem was a different one. The river was there, but the fall had to be created, and to do this it would be necessary to build one of the largest dams ever constructed, a wall, in fact, 1,400 feet long and 154 feet high, at certain points. No such barrier, great or small, had ever been placed across a river of a volume and flow equal to that of the Hudson just above Glens Falls, N. Y., yet this has now been successfully accomplished.

## AGE OF CRIMINALITY.

When Criminal Responsibility of Children Begins in the Different Countries.

With reference to New York's special police court for childish offenders, it is noteworthy that both British and American law fix the same age of criminality. In defiance of theology the legal codes of all nations regard man as sinless by birth. Before attaining a certain age he is regarded as incapable of crime.

In England and America this age is seven years, and before this a child cannot be prosecuted. After his seventh birthday a child is accountable for its deeds, but if under 14 the prosecution must show that he was acting with criminal intent. The same age of criminality is held in Russia and Portugal. In France and Belgium a child must be eight years old before being prosecuted. In Italy and Spain a further year of grace is accorded.

In Norway, Greece, Austria, Denmark, Holland and Switzerland, says the London Chronicle, the age is ten. The little German can play pranks with impunity until 12 years old, while in Sweden no prosecution is allowed when the offender is under 14.

## Miscellaneous.

## The Eminent Kidney and Bladder Specialist.

The Discoverer of Swamp-Root at Work in His Laboratory.

There is a danger prevailing in this country most dangerous because so deceptive. Many sudden deaths are caused by heart disease, pneumonia, heart failure or apoplexy are often the result of kidney disease. If kidney trouble is allowed to advance the kidney-poisoned blood will attack the vital organs, or the kidneys themselves break down and waste away cell by cell. Then the richness of the blood—the albumen—leaks out and the sufferer has Bright's Disease, the worst form of kidney trouble.

Dr. Kilmer's Swamp-Root the new discovery is the true specific for kidney, bladder and urinary troubles. It has cured thousands of apparently hopeless cases, after all other efforts have failed. At druggists in fifty-cent and dollar sizes. A sample bottle sent free by mail, also a book telling about Swamp-Root and its wonderful cures. Address Dr. Kilmer & Co., Binghamton, N. Y., and mention this paper.
